SECTION I: COURSE DESCRIPTION

TITLE

Personnel Security Adjudications Core Competency Training

PURPOSE

To standardize the education and training provided to federal personnel security adjudicators in an effort to ensure the consistent application of national adjudicative guidelines.

SCOPE

This instructor-led course addresses the purpose, intent, requirements and implementation of national adjudication policy and trains personnel security adjudicators in the core skills and competencies required for consistent application of this policy throughout the process of making personnel security determinations.

DESIGN

This training emphasizes consistent application of national adjudication policy and relies heavily on practical exercises. Once the security concerns and possible mitigating factors of each adjudicative guideline are addressed, the students are presented with previously adjudicated case studies requiring application of the guideline. Functioning in the role of adjudicator, the students are confronted with frequently encountered personnel security issues and must uniformly apply the adjudicative policy to make a personnel security determination. These exercises not only provide the students with opportunities for individual practice of the skills taught, but also allow them to function within teams when they are assigned to one of three adjudicative teams, with an instructor functioning as the team leader. The team assignments are based on the student's experience and background to ensure that all teams are closely balanced. The student performs

normal adjudicative functions, adjudicating a wide range of cases under the direction and supervision of his/her team leader.

The final Criterion Exercise assesses the student in a situation closely replicating his/her daily work environment. The student is required to demonstrate mastery of the skills taught by performing as an adjudicator and making personnel security determinations in situations and with responsibilities similar to those currently experienced in his/her duty assignment.

TARGET AUDIENCE

Civilian and contractor employees conducting adjudications or performing adjudicative type functions in Collateral, Sensitive Compartmented Information, Special Access Programs within any Federal agency.

PREREQUISITES

Successful completion of Introduction to Personnel Security Adjudications or other training which addresses the personnel security program requirements applicable to personnel security adjudications and the functions of a personnel security adjudicator.

ACADEMIC REQUIREMENTS

A graded criterion exercise to assess the student's mastery of adjudicative skills and competencies may be administered at the conclusion of this training. This criterion exercise *may* be graded Pass/Fail, with a minimum grade for passing to be determined by each agency.

LENGTH

To be determined based on content and delivery of pre-requisite training
